Architect Marcos Sola

About me

Marcos Javier Sola Architect - 3d Visualizer

Hi! I'm Marcos, an architect committed to my work and profession, which is why I always strive to be in constant learning.
My professional profile is mainly oriented toward the digital side, focused on Files, Modeling and 3D Rendering.
Throughout my work experience, I have always prioritized communication, empathy and teamwork to achieve the best results for the client.
I am currently looking for new challenges to complement my career as a professional, get involved, and keep growing.

Experience

3D Artist & Architectural Visualizer - FrameStudio_render

Mar 2022 - Present

Interpretation of architectural plans into accurate 3D models. Photorealistic rendering for presentations and marketing. Full project management from concept to delivery.

3D Architectural Visualizer & Diseñador — Fiverr (Freelance)

Jan 2020 - Oct 2021

Delivery of architectural visualization services to international clients. Exterior and interior renders, walkthroughs, and presentation materials for residential and commercial projects.

Architect — Provincial Directorate of Architecture & Planning

Mar 2019 - Jul 2019

Site surveys and land assessment for development projects. Architectural design applying functional, aesthetic, and regulatory criteria. Technical documentation and construction specifications.

PFC: PROM

Residential Complex

Residential complex organized around a central courtyard, where vegetation becomes the main architectural element. Climbing plants on the facades and a landscaped common garden generate a biophilic atmosphere that integrates nature into everyday living.

Casa Kóren

Contemporary residence

Single-family residence designed around a warm material palette — exposed concrete, natural wood, and textured plaster. The layout flows from private courtyard to interior living spaces, blurring the boundary between inside and out.

Villa Mirav

Private Villa

Exterior visualization of a contemporary hillside residence. The design contrasts a fluid white volume with natural stone, timber cladding, and lush garden surroundings. The camera angle was chosen to emphasize depth, movement, and the relationship between built form and landscape.

Casa Akai

Interior Desing

Personal interior design project created for Framestudio. The concept draws from Japanese visual language ink murals, low furniture, bold red palette, reinterpreted through a contemporary lens. Developed as a creative exploration of atmosphere and materiality, with lighting as the central narrative tool.

PCR 01

Modern Interior

Interior visualization of a contemporary residential apartment. The design centers on warm materiality, wood paneling, textured rugs, and layered lighting, balanced against a neutral palette that lets each space breathe. Six camera angles capture the full spatial experience from living to kitchen.

Casa Sull

Contemporary residence

Exterior visualization of a luxury residential project with a strong tropical character. Natural stone cladding and vertical wood louvers define the facade, while palm trees and dense greenery soften the geometry.

Verdana

Comercial project

Exterior visualization of a development integrating biophilic design. The facade combines vertical gardens, warm wood cladding, and full-height glazing to create a building that breathes with its environment. The ground floor commercial space reinforces the connection between architecture and street life.
